

PhotoPRINT SERVER-PRO™

Intuitive & Powerful

The user interface is long renowned for its ease-of-use.

The most powerful collection of color tools in a straight-forward package.

A common sense approach to the color dilemma.

View all the information about the jobs in progress, at a glance.

Recommended Software Requirements

Windows Server 2003, XP, Vista

1 Gb RAM or higher

200+ Mb Install space

4+ Gb Working space

16-bit 1024x768 video

DVD drive

Available USB port for key

Broadband Internet connection recommended

Internet connection required

Available port connection for each output device

The Next Step

Upgrade a lower level of PhotoPRINT to SERVER-PRO.

Upgrade an older version of PhotoPRINT or AccuPrint to SERVER-PRO.

Exchange a competitive software RIP to SERVER-PRO.

The complete client-server RIP solution package includes extended capabilities and cost-saving features. Additional features include a separate EDITOR application for layout and design and the Color Profiler for ICC profile creation and editing.

Is PhotoPRINT SERVER-PRO Right for You?

Benefits

- Designed for high production environments with complete flexibility for multiple Mac and PC design stations, as well as multiple printers.
- Color Profiler logically walks you through the steps to create your own custom ICC profiles and edit existing ICC profiles.
- Pantone™ Library and Spot Color Mapping allow you to easily and precisely specify output colors and effortlessly reproduce them again and again.
- Large images can be tiled with advanced control of each panel and overlap amount.
- Industry's most accurate Print & Cut to hybrid or virtual hybrid printer/cutter combinations.
- Nest pages and jobs, manually or automatically, for efficient media usage—even manually edit nested jobs.
- Innovative design application powered by FlexiSIGN™.

Features

- PhotoPRINT 6 gives you the ability to work with over 1000 devices for out-of-the-box production.
- More than 400 ICC Output Profiles are included.
- EDITOR PRO design station includes popular layout and bitmap editing tools plus Template and Serialization tools.

Adobe® RIP Engine

PhotoPRINT is the only solution on the market that seamlessly integrates the latest genuine Adobe RIP Engine, guaranteeing accuracy, reliability and compatibility.
